Election/Restrictions

1. Claim 36 is allowable. Claim 40, directed to wherein the pigment is polymer-dispersed, is no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. However, claims 42 and 44, directed to other blocked acid monomers remain withdrawn from consideration because they remain in conflict with the limitations of the allowable claim 36.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS

Cancel claims 1-35, 42, 44 and 48-65.

3. The following is an examiner's statement of reasons for allowance:

None of the prior art was found to teach an ink-jet ink, wherein, in addition to the liquid vehicle and the colorant dissolved/dispersed in the liquid vehicle, the ink comprises latex particulates dispersed in the liquid vehicle along with released blocking agents;

wherein said latex particulates are formed by:

preparing a monomer emulsion including an aqueous phase and an organic monomer phase including at least one blocked acid monomer,

polymerizing monomers of the organic monomer phase to form blocked acid latex particulates dispersed in the aqueous phase, and

unblocking the blocked acid latex particulates to form acidified latex particulates and released blocking groups; and

wherein the blocked acid monomer includes one of the present blocked strong acid groups.

Thus, claims 36-40, 43 and 45-47 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
